

A Sustainable Future

Education creates a necessary foundation from which to realise the ambitions of this dynamic new industry. This moves from gathering existing valuable insights and expertise towards setting new expectations and advancing our science and knowledge further.

It is this science and knowledge development, to which the Kingdom of Saudi Arabia has an unwavering commitment, that will have a central role in ensuring the long-term success and sustainability of the it's golf industry.

We will lead the way by delivering educational training and creating job opportunities to work in:

- A network of expert sustainability officers;
- A national turf laboratory;
- The world's most comprehensive research agenda;
- A supply chain of sustainable golf suppliers & delivery partners;
- A dynamic group of national sustainability auditors trained and connected to cutting edge innovations in sustainable golf in the 21st century.

Education & Training Opportunities

At the Golf Course

Service, Maintenance and Construction

Creating a skilled and specialist workforce to service and support golf courses to be built, cared for and presented by first class staff.

Syllabus includes:

- Learning practical construction and servicing skills.
- Trained to identify course needs and carry out all maintenance operations.
- Hospitality and service skills needed right across a golf facility.

Research Agenda

Develop innovative technologies and solutions to the industry

Contribute to a national golf research agenda aimed at advancing the industry to new levels and setting global benchmarks.

Targets include:

- Prioritising key topics in areas of water management, carbon accounting and turfgrass.
- Developing innovate ways to maximise industry efficiency and address climate action.

Sustainability

Lead delivery and provide credible assurance for courses

Become part of the dedicated workforce who will carry this work out into the industry and support courses on the ground.

Syllabus includes:

- International expert guidance and mentoring system.
- Learning best practices to integrate sustainability approaches effectively into golf businesses & green economies.
- Auditing and verification tools to uphold standards.
